

Dear Governor Florin ,

As we all know, the COVID-19 pandemic impacted the world by threatening our health, our safety, and our way of life; however, while this crisis is serious, we know that this challenge is a temporary state.

The aim in writing this letter to you is that we can and will overcome the aftermath of this pandemic by working together. As Rotarians, we know how to mobilize our network to reach our goals.

Therefore, we are in the process of suggesting ways to share a few events, one of which will be holding a global organization to host Coronavirus survivors to celebrate their second life in a substantive and meaningful way.

We are planning a three-day event between September 30 and October 03 2022 which will take place in Cappadocia, the beautiful historical region in Central Anatolia. Having been a sanctuary for early Christians, Cappadocia is an open air museum full of unrivalled natural and cultural components, and is most famous for unique geological features called fairy chimneys.

The primary purpose of this event is to let survivors celebrate their recovery as well as informing the participants about the coronavirus outbreak and what this can teach us about the epidemics yet to come, and if countries want to fight outbreaks ,they must act together and help each other which can be realized through Rotary one of whose aims is to promote peace in the world.

Dear Governor Florin, if you are concerned with the aftermath of this global crisis, your and District 2241's presence will be highly appreciated, as a result of which we can start finalizing the program details . As a matter of fact, we have attached an

outstanding three-day Cappadocia tour program for you and Rotarians in your clubs, including all the details.

Yours in Rotary Service,

Rtn.Emre Öztürk

District 2430

Governor 2022-2023

Rtn.Hande Yırdakul
